# PROFILES

LINES

Lines go too quickly to appreciate the pleasures of the journey. They rush straight to their target and then die in the very moment of their triumph without having thought, loved, suffered or enjoyed themselves. Broken lines do not know what they want. With their caprices they cut time up, abuse routes, slash the joyous flowers and split the peaceful fruits with their corners. It is another story with curved lines.

René Crevel — poet

Cover in satin-finished opal methacrylate (high or low) or in a clear version

Anodized aluminium end caps

Profile in anodized extruded aluminium in a natural colour, or black on request

FEATURES

Reduced cross-section

Easy installation with hidden clips or magnet

Various cover versions

Essential design

Full view and recessed installation (wood and Corian®)

ALFA SERIES

APPLICATIONS

The Alfa aluminum profile was designed for integration purposes in furniture, in particular for applications in which installation space constraints are fundamental. Thanks to the reduced cross-section, it seamlessly fits even the smallest spaces. Alfa is available with clear or opal cover and in the higher opal methacrylate cover there is an optimal diffusion of light, and it is thus particularly suitable for installation under suspended cabinets or in brackets of bookshelves, in wooden materials and in Corian®. Thanks to the essential design and the hidden fastening clips this element is aesthetically pleasing even if it is installed in full view or switched off. It is suitable for a variety of different uses: from homes to museum, from contract to retail sales areas.

HOW TO ORDER

CODING

ALFA
| NAME | COVER | LENGTH |

Example: ALFA-CLR150

Note:
Standard cable feed type A
(code CAV-A).
See page 274 for different feeding
configurations.
